Custom Shim Cutting

Accushim, Inc. can fill your custom shim needs with CNC Laser cutting that is fast and economical in any type of steel, and many non-metals. It causes no distortion or burrs and is accurate to ±.001". Best of all, there are no tooling costs or long lead times that go with die cutting. Call, fax, or email Accushim for a prompt quotation.

We also carry a complete line of precision dial indicator and LASER shaft/coupling alignment systems.
